Frontend-focused Senior Engineer and former IBMer with 7+ years building enterprise web apps in TypeScript, React, Angular, and Vue. Leads framework migrations, reusable component architectures, and dynamic, permission-aware UIs that make complex backend systems usable, backed by strong REST API and testing experience.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL, Java
Frontend Frameworks	React 18 (component architecture, Redux, MobX), Angular 18+ (NgRx), Vue.js, Webpack
UI Architecture	IBM Carbon Design System, reusable component libraries, Storybook, dynamic forms, role-based UI, WCAG
Testing	Jest, Playwright, Cypress, Jasmine, Mocha, Cucumber, JUnit (unit, integration, E2E)
APIs & Integration	RESTful APIs, GraphQL, reusable service layers, Node.js, Express, Fastify, microservices
Cloud & DevOps	AWS (Certified Developer), Azure, Docker, Kubernetes, Helm, Terraform, Jenkins, CI/CD
Practices	Technical leadership, code review, Agile/Scrum, AI-assisted development (Claude Code)

PROFESSIONAL EXPERIENCE

Capital One | Senior Software Engineer | Atlanta, GA July 2024 – Present

- Architected modular, reusable front-end components and Angular 18+/NgRx SPAs, enabling rapid delivery of new product variations on a shared platform.
- Designed and scaled enterprise platforms unifying resource and risk management workflows used across **10 business teams**; partnered with Product and business stakeholders to drive architecture decisions.
- Owned end-to-end performance and reliability across front ends and Node.js services; introduced observability and distributed tracing with Splunk and CloudWatch, improving overall system performance by **25%**.
- Built the Fastify/Node.js REST APIs behind the UI on AWS Lambda with PostgreSQL, improving data-access performance by **20%** through indexing, query tuning, and connection pooling.
- Building Playwright end-to-end test suites for critical UI flows and integrating Claude Code into daily development workflows to speed up delivery.

Cricket Wireless | Full Stack Engineer | Atlanta, GA Feb 2024 – July 2024

- Led migration of a legacy vanilla JavaScript codebase to React 18/TypeScript, cutting feature delivery time by **20–30%**.
- Built customer-facing wearable features in React 18/TypeScript across **15+ pages** serving **40K+ daily users**, integrating the UI with backend services.
- Expanded automated test coverage with Jest and Cypress and delivered WCAG-compliant accessibility, reducing production defects.

Universal Orlando Resort | Senior Software Engineer | Orlando, FL Aug 2023 – Feb 2024

- Built Node.js integrations powering React 17 and Angular 15 guest-facing apps with consistent API contracts.
- Built an event-driven Kafka processor with Node.js and Azure, scaling ticket throughput to **150+ per second** during peak traffic.

IBM | Software Engineer | Sandy Springs, GA Feb 2022 – Aug 2023

- Delivered core React 17+ platform features for a **$3B** ecosystem modernization initiative, supporting enterprise partner workflows on a Spring Boot/Kubernetes microservices backend.
- Built dynamic forms, filters, transitions, and role-based permissions in React with IBM Carbon Design System (Webpack), making complex incentive and approval workflows accessible to non-technical partners and increasing user adoption.
- Led migration of **90K+** enterprise opportunities to next-generation incentive systems with automated TypeScript/Node.js data pipelines.
- Implemented TypeScript business logic for approvals, incentive calculations, and partner workflows; deployed to Kubernetes with Docker, Helm, and Jenkins CI/CD.

Stanley Black & Decker | Software Engineer | Atlanta, GA Oct 2020 – Feb 2022

- Built a manufacturing analytics platform with React 17 (plus legacy Vue.js components) on Node.js and MSSQL, improving data visibility, response capture, and claims processing.

Itlize Global LLC | Full Stack Developer | Piscataway, NJ Jun 2019 – Oct 2020

- Delivered internal and multi-tenant apps with React 16, Angular, and Node.js, including employee tracking, feedback, security, and role-based access.

EDUCATION & CERTIFICATIONS

B.S. in Computer Engineering, University of Arkansas (May 2019) · **AWS Certified Developer – Associate** (June 2024)
