Full Stack Senior Software Engineer with 7+ years of experience building high-performance web applications with JavaScript, TypeScript, Angular, React, and Node.js. Adept at leading cross-functional Agile teams to deliver scalable, production-grade frontend and backend systems.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Java, SQL
Frontend:	React 18, Angular 18+, Redux, NgRx, Mobx, HTML, CSS
Backend:	Node.js, Express, Fastify, Spring, Hibernate, REST APIs, GraphQL
Databases:	PostgreSQL, MSSQL, MongoDB, DynamoDB, CouchDB
Cloud & DevOps:	AWS, Azure, Docker, Kubernetes, CI/CD, GitHub, Terraform
Messaging & Caching:	Kafka, Redis
Testing	Jest, Jasmine, Mocha, Cypress, Cucumber, JUnit
Tools:	Storybook, Camunda Cockpit, Splunk, Observe

PROFESSIONAL EXPERIENCE

Capital One | Senior Software Engineer | Atlanta GA July 2024 – Present

- Designed and scaled full-stack enterprise platforms using Angular 18+/NgRx and Node.js (Fastify), unifying resource and risk management workflows across 10 business teams.
- Built Fastify/Node.js REST APIs on PostgreSQL (TypeORM) and stabilized a failing Spring Boot process, improving data-access performance by 40% through indexing and query tuning.
- Developed modular, reusable Angular SPAs with NgRx state management, enabling rapid delivery of new product variations on a shared platform.
- Owned end-to-end performance and reliability across Node.js services and Angular frontends, leading production deployments, CI/CD updates, and incident resolution; introduced observability and distributed tracing via Splunk and CloudWatch, improving overall system performance by 25%.
- Integrated Camunda workflow automation into Node.js backend services to support automatic and manual claim decisioning, enabling non-technical teams to manage business processes without code changes.

Cricket Wireless | Full Stack Engineer | Atlanta, GA Feb 2024 – July 2024

- Developed wearable features with React 18/TypeScript and integrated frontend with backend services, enhancing UX across 15+ pages and supporting 40K+ daily users.
- Modernized a legacy React 16 codebase to React 18/TypeScript, reducing new feature implementation time by 20–30%.
- Strengthened React application stability by expanding automated test coverage (Jest, Cypress) and WCAG-compliant accessibility, reducing defects.

Universal Orlando Resort | Senior Software Engineer | Orlando, FL Aug 2023 – Feb 2024

- Created RESTful APIs with Node.js/Express/Azure to interact with third-party APIs and data stored in CouchDB and MSSQL.
- Built a Kafka event processor with Node.js and Azure, scaling ticket throughput to 150+ per second and enabling smoother guest transactions during peak hours.
- Built Node.js backend integrations powering React 17/Angular 15 guest-facing apps, ensuring low-latency data flow and consistent API contracts.

IBM | Software Engineer | Sandy Spring, GA Feb 2022 – Aug 2023

- Delivered core platform features for a $3B ecosystem modernization initiative using React 17+ and Node.js, supporting enterprise partner workflows across a Spring Boot/Kubernetes microservices backend.
- Led migration of 90K+ enterprise opportunities to next-generation incentive systems using automated TypeScript/Node.js pipelines.
- Improved UI/UX in React 17+ by building dynamic forms, filters, transitions, and role-based permissions, significantly enhancing navigation and user adoption.

- Implemented complex business logic in Node.js/TypeScript for approvals, incentive calculations, exchange rates, and partner workflows.
- Deployed Node.js microservices to a cloud-native Kubernetes environment (AWS, Docker, Terraform, Helm) with automated Jenkins CI/CD pipelines.

Stanley Black & Decker | Software Engineer | Atlanta, GA Oct 2020 – Feb 2022

- Built a manufacturing analytics platform with React 17 and Node.js (plus legacy Vue.js components) and MSSQL, improving visibility, response capture, and claims processing.
- Designed SQL ER diagrams and Node.js APIs to support data collection and processing workflows throughout the application.

Itlize Global LLC | Full Stack Developer | Piscataway, NJ Jun 2019 – Oct 2020

- Delivered an internal management system and multi-tenant apps with React 16, Angular, and Node.js (Spring Boot backend services), supporting employee tracking, feedback, security, and role-based access

---

EDUCATION

B.S. in Computer Engineering, University of Arkansas May 2019

CERTIFICATIONS

AWS Certified Developer - Associate June 2024
