Full Stack Senior Software Engineer with 7+ years building high-performance web applications and services with TypeScript, React, Angular, Node.js, and AWS. Owns features end to end, from UI and REST APIs to databases, event-driven systems, CI/CD, and production performance, and leads cross-functional Agile teams.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL, Java
Frontend	React 18, Angular 18+, Vue.js, Redux, NgRx, MobX, Webpack, Storybook, Carbon, WCAG
Testing	Jest, Playwright, Cypress, Jasmine, Mocha, Cucumber, JUnit (unit, integration, E2E)
Backend & APIs	Node.js, Express, Fastify, REST APIs, GraphQL, Spring Boot, microservices, Kafka, Redis
Databases	PostgreSQL, MSSQL, MongoDB, DynamoDB, CouchDB
Cloud & DevOps	AWS (Certified Developer), Azure, Docker, Kubernetes, Helm, Terraform, Jenkins, CI/CD
Practices	Technical leadership, code review, Agile/Scrum, AI-assisted development (Claude Code)

PROFESSIONAL EXPERIENCE

Capital One | Senior Software Engineer | Atlanta, GA July 2024 – Present

- Designed and scaled full-stack enterprise platforms with Angular 18+/NgRx and Node.js (Fastify), unifying resource and risk management workflows used across **10 business teams**.
- Built Fastify/Node.js REST APIs with PostgreSQL (TypeORM) on AWS Lambda, improving data-access performance by **20%** through indexing, query tuning, connection pooling, and provisioned concurrency.
- Owned end-to-end performance and reliability across Node.js services and front ends; introduced observability and distributed tracing with Splunk and CloudWatch, improving overall system performance by **25%**.
- Integrated Camunda workflow automation into Node.js services for claim decisioning, letting non-technical teams change business processes without code changes.
- Built Playwright end-to-end test suites and integrated Claude Code into daily development to speed up delivery.

Cricket Wireless | Full Stack Engineer | Atlanta, GA Feb 2024 – July 2024

- Built wearable features in React 18/TypeScript integrated with backend services across **15+ pages** serving **40K+ daily users**.
- Led migration of a legacy vanilla JavaScript codebase to React 18/TypeScript, cutting feature delivery time by **20–30%**.
- Expanded automated test coverage with Jest and Cypress and delivered WCAG-compliant accessibility.

Universal Orlando Resort | Senior Software Engineer | Orlando, FL Aug 2023 – Feb 2024

- Built an event-driven Kafka processor with Node.js and Azure, scaling ticket throughput to **150+ per second** during peak traffic.
- Created RESTful APIs with Node.js/Express integrating third-party APIs with CouchDB and MSSQL, powering React 17 and Angular 15 guest-facing apps.

IBM | Software Engineer | Sandy Springs, GA Feb 2022 – Aug 2023

- Delivered core platform features for a **$3B** ecosystem modernization initiative with React 17+ and Node.js on a Spring Boot/Kubernetes microservices backend.
- Led migration of **90K+** enterprise opportunities to next-generation incentive systems with automated TypeScript/Node.js data pipelines.
- Implemented Node.js/TypeScript business logic for approvals, incentive calculations, exchange rates, and partner workflows, with dynamic forms and role-based permissions in React (Carbon Design System).
- Deployed Node.js microservices to Kubernetes on AWS with Docker, Terraform, Helm, and Jenkins CI/CD.

Stanley Black & Decker | Software Engineer | Atlanta, GA Oct 2020 – Feb 2022

- Built a manufacturing analytics platform with React 17, Node.js (plus legacy Vue.js components), and MSSQL; designed the SQL data models and APIs behind it.

Itlize Global LLC | Full Stack Developer | Piscataway, NJ Jun 2019 – Oct 2020

- Delivered internal and multi-tenant apps with React 16, Angular, Node.js, and Spring Boot services, including employee tracking, security, and role-based access.

EDUCATION & CERTIFICATIONS

B.S. in Computer Engineering, University of Arkansas (May 2019) · **AWS Certified Developer – Associate** (June 2024)
